

SCHOOL OF BUSINESS AND ECONOMICS | Summary of ETS Field Test Results

The faculty of the School of Business and Economics is devoted to quality teaching. Our success is best demonstrated by the achievements of our undergraduate and MBA students whose performance on business field examinations administered by Educational Testing Service often put them in the top 10 percent of students from hundreds of universities around the U.S. These tests have been required of all undergraduates since 1996 and MBAs since 2002.
