COURSE DESCRIPTION

Decision making is the central element of managerial action. Managers are constantly barraged with information. Sometimes this information is reliable often times it is not. Managers must regularly choose courses of action in the face of many uncertainties. Unfortunately, due to the complexity of the global economy and the sheer amount of information, these decisions are often made much more rapidly than managers would like.

Much of how we think and act is not based on rational thoughts, but rather (un)conscious influences. Yet, traditional approaches to managerial decision-making are based on rational, rule-based models that merely outline steps in the decision process. These models usually seek to maximize utility, emphasize successful precedents, and/or provide a framework for multi-party participation. Needless to say, such archetypes often overlook important decision-making elements which can drastically influence outcomes.

Managers who have good decision-making skills know how to recognize problems, frame the issues, and analyze solutions. Managers need to be able to think effectively about the inputs into a decision analysis, whether to trust the analysis, and how to use the information to guide actions by themselves and their firms. Most important of all, at a psychological level, decision makers need to know how to make effective, unaided intuitive decisions, and to recognize the limits of their intuitive skills.

Effective managers must be able to operate in politically charged environments at both the macro and micro levels. They must be able to apply a cross-functional approach and envision both the “big picture” and the “local impact” of their decision. Hence, not only do managers have to have technical skills, they must also excel at applying soft skills in an effort to influence positive outcomes.

This course is designed to make you a better decision maker. This course is complex, demanding, multidisciplinary and interdisciplinary. This course is also a way for you to showcase your knowledge, network with other managers and channel adrenalin of leadership!

Join us this semester as we master the skills of decision making!

**WHO SHOULD TAKE THIS COURSE**

Students who want to obtain a basic understanding of managerial decision-making are encouraged to take this course. This course deals with issues that are often explicitly racial, sexual, violent and controversial. As such, this course is designed for those over the age of 18. This is a graduate-level course that will **not** adhere to political correctness. At times the subject matter may be extremely graphic. Students who are offended by explicitly racial, sexual, violent, controversial subject matter, may want to refrain from taking this course.

Those who wish to improve their ability to critique and extend their knowledge as to better developing and expressing their opinions are also encouraged to take this course. **We will be applying a critical analysis, readily utilizing variables of gender, race, ethnicity, citizenship, class and sexual orientation (GRECCSO). Students whose beliefs are affronted by critical analysis or those who believe their personal tenets would be irrepairably harmed by our interpretation of the issues may want to abstain from taking this course.**

**COURSE FORMAT**

During each class period, we will discuss historical and contemporary issues in managerial decision-making. We will look at these issues within a framework that will help you improve your ability to think and reason and to better comprehend the basis of your opinions. For the most part, you will find that this is “your course,” and all of you, collectively, will make it work. The theory is that by participating in this course you will develop and enhance skills that will help you throughout your academic and professional careers.

As with most of my courses, classes will be taught in the **SOCRATIC METHOD**, or a modified version thereof. This is a highly interactive course using discussion, some lecture, film, exercises, as well as small and large group discussions. Students are responsible for reading the chapters and related assigned materials **prior** to class. **We will foster a supportive environment for those of you who are shy or nervous about speaking in front of a class!!**

We will be utilizing ONCOURSE ([https://oncourse.iu.edu/portal](https://oncourse.iu.edu/portal)) for class notes, etc. I encourage you to bring in articles and clippings on topics that you deem relevant or important and would like to share with the class. It is the student’s responsibility to access and utilize ONCOURSE.

If you need certain accommodations because of a diagnosed learning disability please speak with me. You may also contact the **Office of Disabled Student Services** ([http://www.iusb.edu/~sbdss/services.shtml](http://www.iusb.edu/~sbdss/services.shtml)).
