The Dorothy Allen Memorial Mathematics Scholarship was established to honor Dorothy Allen's life. The winner of this scholarship is selected from current international undergraduate and graduate students majoring in the Department of Mathematical Sciences at IU South Bend. More information regarding the scholarship can be found at [http://www.iusb.edu/~sbmath/dallen.shtml](http://www.iusb.edu/~sbmath/dallen.shtml). The Scholarship will be presented to Ms. Senlin Li at the IUSB College of Liberal Arts and Sciences Honors Day Ceremony on Thursday, May 6, 2010 at 7:00 PM in the campus main auditorium.

Mr. Senlin Li graduated from a high school in China and then went to the University of Central Arkansas in 2007. After two years in Arkansas, he transferred to IUSB in the spring of 2009. So far he has a cumulative GPA of 3.975, and he has been on the College Dean's List for both 2009 and 2010.

Growing up in China, his family and teachers taught him to uphold Confucianism, modesty, and hard work; he has been applying these values to his academic career. In replying to the news that he won this award, he wrote, “There is so much to learn in my life; it is my great honor to receive this scholarship. This honor will be a motivating power for me to work even harder for my life and for my career path. There is nothing in the world that comes to people without trying to put in the effort.”

Senlin has been a math tutor in our mathematics tutoring center and an active member of the Actuarial Science club. In choosing an actuarial career, he plans to work on the “retirement insurance” problem in China, an important social issue in China since it does not have a well established Social Security system. In addition, the government’s “One Child” policy will create a large aging population that depends on fewer young tax payers to support their retirements.
