Charge Up Your Cell Phone With Powermat

**37 Charging Mats**

Forgot your charging cord? Can’t find an available electrical outlet? Well, no need to worry. UITS will be installing 37 Powermat charging stations in the Franklin D. Schurz Library. Charging stations are green and environmentally friendly.

**What Types Of Phones Can Be Charged?**

Most types of phones can be charged for free using the new wireless charging mats: New Apple, old Apple, Android, Windows, Samsung and Galaxy.

**How Does It Work?**

The first step is to download the Powermat app which is located here: [https://powermat.com/app/](https://powermat.com/app/)

The Powermat app will make it easy to locate other charging stations and even lets you know when the battery is getting low.

Some phones require an adaptor ring, which can be checked out at the Library Commons for free. Rings may be also be purchased for $10. UITS hopes the bookstore will be able to sell the rings. Rings can also be purchased online through AT&T or through Powermat. If a student purchases through Powermat, he or she will receive a kit with a charging plate and a ring that can be used at home or on the go.
IU Print - Have Your Student ID Ready

The print system requires the use of student ID cards. If you don’t have a student ID, stop by the Gateway Information Center in the Administration Building to get one.

The Administration Building is open:
- Weekdays - 7am - 10pm
- Weekends - 7am - 8pm

Gateway Information Center hours:
- M-Th - 8am - 5:30pm
- F - 8am - 5pm

You Can Print Using E-mail with IU MobilePrint

1. Send document(s) from your official IU email address to IU Print as attachment(s) in an e-mail message. Use any device that can send e-mail using your IU e-mail. Send to:
   - Black-and-White = print.iu.edu
   - Color = printc.iu.edu

   A special e-mail subject or message body is not required. Afterwards, you should receive a confirmation e-mail that your documents were accepted.

2. Use a campus IU Print station to release waiting print jobs. Visit a color or black-and-white print station depending on which address you used. Swipe your Student ID at the release station and follow the prompts. Queued jobs will wait for release for up to 4 hours before expiring.

3. Register other, non-IU e-mail accounts for use. Browse to your IU MobilePrint Control Panel [https://mobile.print.iu.edu:9001/webrelease/](https://mobile.print.iu.edu:9001/webrelease/). Login. Click arrow next to your username to see your list of approved e-mail accounts. Add other e-mail addresses. Also, see more print options.

   For detailed information:
   - Visit the IU PRINT Portal [http://print.iu.edu](http://print.iu.edu) for IU Print Information and to view account balances.
   - View the IU MobilePrint KB article: [https://kb.iu.edu/d/bdwt](https://kb.iu.edu/d/bdwt) for more mobile printing information.

   For further assistance:
   Contact a lab consultant or the UITS Support Center.

One.IU Is Here

Search, Click, Done! It’s That Easy With One.IU

Hundreds of Available Tasks
One.IU is designed with the appearance of an app store to help you find what you need at IU with hundreds of available tasks.

Find What Task You Need
Tasks are the main function of One.IU. In One.IU you can search for a task by name just as you would do in an app store. You can also search the category list to easily complete tasks such as finding a class, checking your grades or paying a bill.

One.IU Features
- One.IU supports all devices (phones, tablets, laptops, desktops).
- Simple navigation, based on browsing with icons for each task.
- Tasks are easily identified by name and category.
- View task details and directly link to what you need, without having to authenticate until needed.
- Once you are logged in, you can comment on and rate tasks, select “Favorites” for future easy access, and set preferences for your particular campus.
- Tasks are optimized for search engine indexing.
- Task Centers can be organized to collect related tasks, for example, a Task Center could be used to gather all tasks related to Freshman Orientation.

More About One.IU Tasks
- Tasks represent activities or services that people need to access, and are designed to get people where they are trying to go.
- When searching in One.IU, a list of tasks is returned - you just choose which one(s) you need.
- Publishers can submit a request to the One.IU team to have a task featured on the top page.
- Each task has a details area with a link to write a review.

**Partnering To Automate Video Production**

UITSouth Bend Center for Distance Education, and the Franklin D. Schurz Library are partnering to automate video production in the Multimedia Production Studio (MMPS). The One Button Studio will enhance teaching and learning at IU South Bend by allowing students and faculty to record high quality video content without technical expertise.

**Focus On Delivering The Message**

When users insert a thumb drive and press the big button, the One Button Studio will turn on the lights, microphone and camera, and begin a three second countdown. When the recording is complete, users will press the button again and remove the flash drive, which is now loaded with their movie.

“This will lower the bar for video creation so faculty and students can focus on content rather than technology,” said Joel Langston, manager of Media Services at IU South Bend.

According to Langston, “Traditionally, shooting a good quality video on your own involves going through the settings in the camera’s menu, connecting a microphone, microphone selection and working out the placement of lights. Add to that getting the file into a computer in the proper format, and you end up with a lot of variables that can go wrong. By managing all of that with the technology, the One Button Studio allows users to focus on delivering the message.”

**One Button Studio @ IU**

The One Button Studio was developed at Penn State, where students use it for practicing classroom presentations, creating e-portfolio introductions and completing multimedia project work. Faculty members use it to create course introductions, departmental testimonials, and “mini-lectures” for blended learning classes. Other Universities, including Notre Dame, have had success with the Penn State model, and Indiana University has installed five of the One Button Studios at the core campuses.
Classroom Technology
Upgrades Continue

UITs continues to upgrade the technology in IU South Bend classrooms to better fit evolving pedagogies.

The new technology lecterns include digital connections for tablets, laptops, and smart phones, and a touchscreen that offers status feedback and onscreen help.

The new lectern may be customized to allow students in breakout groups to show their work on the screen, or to provide easier connections for videoconferencing or lecture capture using Echo360.

The upgrade schedule may be found on the CTS website at: Classroom Technology Upgrade Schedule

No Sides On This Box

• Unlimited Storage
Indiana University now provides every student, faculty and staff member free unlimited secure storage.

• Access it anywhere
Users have remote access to data and files anytime and from anywhere with an internet connection.

• Use it on multiple devices
Use Box on your computer, laptop, tablet, or other smart devices.

• Work across platforms
Sync up files from Windows and modify it on Apple OS and Linux or vice versa.

• You decide what to sync
Box lets you decide which folders automatically sync to have the most recent and up-to-date information available where you need it.

• It’s good to share
Box’s cloud environment encourages collaboration – share and discuss documents with others inside and outside of IU.

• Manage files
Keep track of multiple versions of your document automatically and lock documents while editing, so others can’t accidentally overwrite your changes.

• Back up essential files
Everything you save in a synced Box folder is automatically backed up to “the cloud”.

• One less thing to forget or lose
Become less reliant on portable storage devices.

Knowledge Base

The Knowledge Base (KB) is your source for all IU tech answers. The KB provides robust and powerful searches, and is integrated with IU systems. It’s also mobile friendly for tablets and smartphones.
